

XIII INTERNATIONAL COAL PREPARATION CONGRESS

BRISBANE, 1998

VOLUME II

CONTENTS

Session K—Sensors 1

K1 On-line coal quality monitoring

D Page

K2 Stockpile management procedures using differential GPS

P T Keleher, D W Cameron, M Knijnikov

K3 Development of an on-line froth vision system for control

K K Nguyen, P N Holtham, I R Brake

K4 On-line monitoring of dense medium cyclones in coal preparation plants
using vibration signal analysis

B Boashash, D T Hornsby, D R Mander

Session L—Moisture Control

L1 Residual moisture reduction through the development of an air-purge
centrifuge

K P Galvin, S K Nicol, C J Veal

L2 Field testing and commercialization of the US Department of Energy's
GranuFlow process

W W Wen, R P Killmeyer

L3 Industrial use of tangential air-blow for cake removal in continuous vacuum
filters

J Blaschke, W Blaschke

L4 Development of a method for sizing industrial horizontal vacuum belt filters
using leaf test data

F S Bourgeois, J A Pollack, J N Graham

L5 Product moisture after the centrifugation of coarse coal

A Hoskins, E T White, B R Stanmore, B A Firth, M O'Brien

Session M—General 1

M1 The solid wastes of coal preparation as a fuel contained feedstock for different branches of industry

M J Shpirt, A Y Molchanov, N P Gorjunova

M2 Grindability of clean coals obtained by molten caustic leaching in relation to desulphurization and de-ashing properties

T Oki, S Owada, Y S Chong, T Harada, T Moro

M3 Important characteristics of a gas-promoted oil agglomeration process

M Shen, T D Wheelock

M4 Improved utilization of fly ash through beneficiation

J B Rubinstein, S T Hall

M5 Combined technological process for coal treatment in new coal mine 'Melnica'

R Ignjatovic, N Madgalinovic, M Ignjatovic, R Maric, M Trumic

M6 Novel dewatering system for aiding the solid-liquid separation of coal slurries and tailings

G M Moody, P McColl

Session N—Dewatering/Flocculation

N1 Fine coal particle aggregation in coal preparation plant circuits

J S Laskowski, Z Yu

N2 Pilot scale dewatering studies of ultra-fine clean coal

B K Parekh, J G Groppo, O Tao, W W Wen, R P Killmeyer

N3 The Goedehoop colliery discard retreatment plant

D P Power

N4 Codisposal and emplacement system for Charbon colliery

K W James, D J Williams, R J Hayes

Session O—General 2

O1 Coal handleability: a quick and simple assessment

D W Brown, B P Atkin

O2 Recovering bituminous coal fines: a discussion on the production of coal-water slurry fuels and its relationship to fine coal cleaning

J L Morrison, A W Scaroni, J J Battista

O3 Advanced dry beneficiation of coal

C Qingru, Y Yang

O4 Application of some aspects of coal preparation technology to oil sands extraction

M W Mikhail, A I A Salama, Y Cheng

O5 Water quality as a factor affecting elementary operations in the water slurry circuit

L Kurczabinski

O6 A basis for jig control

Fu D, Liu W, Wang Y, Qi Z

Session P—Agglomeration

P1 Thermal moulding of brown coals and peat to produce environmentally safe fuel briquettes

G S Golovin, I K Nekhoroshy, A P Fomin, V N Epplae

P2 Binderless briquetting of bituminous coal

G W Kalb, R P Whitt, A Boire

P3 Development of a full scale selective oil agglomeration plant

J Donnelly, B Cooney, I Hoare, B Waugh, R Robinson, R McCollough

P4 Upgrading of sub-bituminous coal for improved metallurgical performance

G Mathieson, C Pearson, K Clark, R Meakins, G W Kalb

P5 Development of technology of receiving improved briquetted fuel from coal slimes and fine classes

S S Budayev, BI Linev, Y U Niphotov

Session Q—Flotation 2

Q1 Fine coal flotation at Kleinkopje colliery in South Africa

A N Terblanche, W A Grobler, N A Matodes, M J Shaw

Q2 Development and application of type XPM-16 and XFM jet flotation cells

M Lianqing, W DaiWei

Q3 Turboflotation for fine coal

P K Ofori, B Firth

Q4 Flotation kinetics—problems and solutions

J Rubinstein, K Kalinowski

Q5 The development and commissioning of a new 450t/h Microcel™ column flotation circuit for BHP Coal's Peak Downs coal preparation plant

I R Brake

Session R—Sensors 2

R1 Elemental control of coal preparation processes in real time

R H Sanders, K G Smith

R2 Application of machine-vision in optimization of coarse coal cleaning circuits

A N Buckley, G A Huber, S K Nicol

R3 Data utilization and sensor development: a joint effort

R G Jung, S Schindel, T F Jones, S T Hall

R4 Rapid quality analyzer for coals and coal preparation products

W Mironowicz, T Sikora

R5 Multifunctional ash monitor 'Kanal' (Channel) and its potential for ash monitoring in preparation plants and process streams

NI Borushko, HI Mikhailov, A G Utemov

Session S—Simulation 1

S1 Fluid and particulate flow on spiral separators: computational simulation and validation

B W Matthews, P Holtham, C A J Fletcher, K Golab, A C Partridge

S2 Stochastic multidimensional analysis of the enrichment ability and enrichment of Polish coals

T Tumidajski, M Brozek

S3 To predict the specific gravity distribution of raw coal via its total ash content

M Lu, J Lui

S4 Evaluation of mathematical functions used for representing partition data: a case study

D Paul, C Maronde, R P Killmeyer

Session T—Simulation 2

T1 Computer-based project tools

M J Bowness, P J Goodman, R W Leaning, P N Lidgate

T2 Use of simulations in coal preparation plant practice

C J Clarkson, D J Edward, A E Lahey

T3 Impact of coal variability on plant operations and design

A Swanson, R Drummond, K Calvin, P Mullins
